DISCLAIMER: FX 365 believes that students should be aware of the risks associated with Forex trading. Forex trading is highly speculative in nature which can mean currency prices may become extremely volatile. Forex trading is highly leveraged, since low margin deposits normally are required, an extremely high degree of leverage is obtainable in foreign exchange trading. A relatively small market movement will have a proportionately larger impact on the funds you have deposited. You may sustain a total loss of your funds. Since the possibility of losing your entire cash balance does exist, speculation in the Forex market should only be conducted with risk capital you can afford to lose which will not dramatically impact your lifestyle.
